

Why Compiere is best for Business:

Business in Power

Compiere ERP is the world's leading open source software for business transaction management. Compiere enables enterprise to integrate Sales, Shipping, Purchasing, Warehouse, and Accounting with powerful integration necessary to run everyday business.

Cost Effective

Built on industry-proven technologies, e.g., Java, JBOSS, and Oracle, Compiere can run on Windows, UNIX, Linux and can support from ten to thousands of users with fraction of the cost in comparison with other ERP package.

Compiere is the most cost effective and the most flexible to meet your special needs and your business growth.

Flexible

Functional: Open source software allows you to have Compiere customized to meet any requirements and to run on any computer device.

Report: Compiere empowers user to customize their own report formats based on the standard reports. It also allows exporting of OLAP data to Excel Pivot tables.

Workflow: Compiere can control business document, for example, Purchase Requisition, to flow through approval route, approval user role, and approval user limit in the organization.

Critical Business Alert: Business can rely on Compiere to send online alerts or emails for reminding of important matters such as due date or expiry date.

Business in Control

Transaction Management: Compiere allows users to handle various stages of business transactions including Draft, Pending for Approval, Complete, and Cancel. It also provides audit functions for Manager to keep logs of who, when, and what change is made on the document.

Document Management: Compiere enables business users to attach reference document (.pdf, .doc, .jpeg) with business transactions including Quote, Purchase Order, etc.

Security Administration: Compiere allows users to access information on the basis of "what is needed". Manager can manage what Windows, Reports, and Process that a user can have access to use data.

Local/Global Business Platform

Localization for Thailand: Signify Co. Ltd. has customized Compiere to meet the needs for Taxation by Thailand's Revenue Department and Generally Accepted Accounting Practice (GAAP).

Global Trade Support: Compiere supports multi-languages, multi-currencies, multi-tax rules, multi-business units, and multi-accounting rules.

Long-Term Investment

Your IT investment is for long term. Your IT systems need to be reliable, flexible, and growable with your organization. Nonetheless, it does not need to be too expensive. Signify's Compiere ERP practice can help you achieve your goal with manageable budget.

"Effective organizations rely on business process and actionable information to help them manage the right opportunities, the most successful products, the best employees, and the most reliable suppliers." These are the areas Signify can provide solutions to.
